

# Full Stack Data Science With 1 Year Internship

---

[JOB GUARANTEE PROGRAM](#)

# What You'll Learn

---

- Python
- Stats
- Machine learning
- Deep learning
- Computer vision
- Natural language processing
- Data analytics
- Big data
- ML ops
- Cloud
- Data structure and algorithm
- Architecture
- Domain wise project
- Databases

# Service from iNeuron

---

- Live class for complete course
- Pre – recorded video for FastTrack after launch of course in 3 month
- All live class recordings
- All live class notes
- Mail support for doubt clearing
- Live doubt clearing session weekly
- Live doubt clearing after class
- Skype support for all 7 days except public holidays from morning 9 AM IST to night 2 AM IST for doubt clearing
- Quick response team for your interview preparation
- Lifetime content , dashboard and service access from iNeuron
- Profile building after every major module
- Project in every section
- Sample resume for all level

# Service from iNeuron

---

Assignment in every module

Remote Internship

Questions for interview preparation

# Common questions

---

- Will I be able to make a transition if I am from non tech or non IT background ?
- Is there a sufficient number of jobs available in market for this profile ?
- Will I will able to get into an industry if I am fresher ?
- Will I be able to make a transition if I am a experienced person ?
- How I am suppose to prepare my profile if I am from non tech or non data science background ?
- Is it compulsory to know all the tech related to data science while preparing for transition ?
- Which company is hiring person in this area ?
- Will I be able to do internship if I am a working professional ?
- What are the platform where I can apply for data science job ?

# Common questions

---

- How much assignment ,projects I have to complete for job guarantee ?
- How much time I have to spend for this course after class ?
- How I am suppose to prepare my profile for data science ?
- How I can showcase my project and experience in data science ?
- How will be job market after sometime in data science ?
- Do I have to prepare for data structure and algorithm for data science job?
- What kind of job I will be able to get in data science field ?
- What if I have a career gap ?
- How iNeuron will help us with interview preparation ?

# Common questions

---

- How much time it will take to complete this course ?
- I am from teaching background will I be able to make a transition into data science industry ?
- Will I be able to work with iNeuron team ?
- How much salary I will be able to get ?
- I am suppose to do master's in data science of equivalent field ?
- How my previous experience will be counted while doing a transition ?
- Will I be considered as fresher if I have industry experience in different domain ?
- How much experience I have to show case in my resume for data science ?
- How many project I have to showcase in my resume ?
- Will I be able to show iNeuron project in my profile ?
